Top 5 models by modelled gross profit

Category profitability

Category	Modelled sales value	Modelled gross profit	Modelled gross margin
Accessories	507.330,99	318.823,94	62,8 %
Bikes	8.468.854,53	3.477.544,92	41,1 %
Clothing	209.263,93	92.660,11	44,3 %
Total	**9.185.449,45**	**3.889.028,97**	**42,3 %**

Returns relative to sales by category

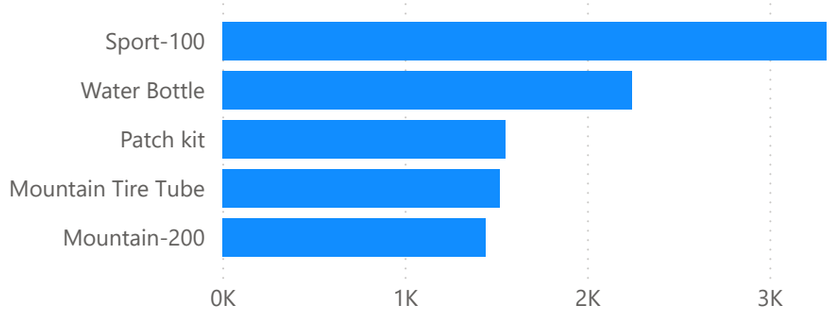

Category	Units sold	Units returned	Returned-to-sold units ratio
Accessories	32493	639	2,0 %
Bikes	5689	171	3,0 %
Clothing	7132	162	2,3 %
Total	**45314**	**972**	**2,1 %**

Methodology: Values modelled using fixed product prices and costs; currency unspecified. Returns ratio compares units recorded in the same period, not returns linked to those sales.

Distinct buyers' profiles for H1 2017

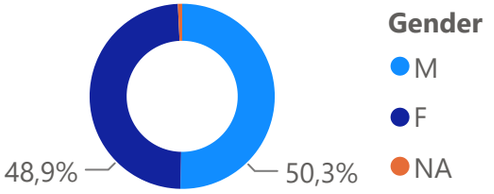

Overall H1 2017: 81.4% of buyers were aged 45+ at 30 June 2017. The largest recorded annual-income band was 40,000–79,999 (47.6%). Sport-100 reached the most distinct buyers (3,313).

Top 5 models by distinct buyers | H1 2017

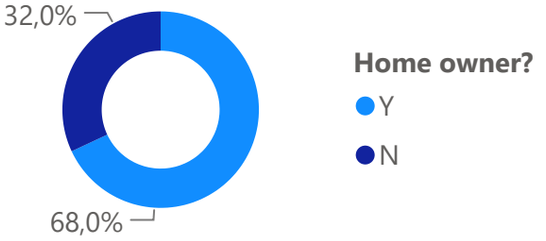

10.502
Distinct Buyers

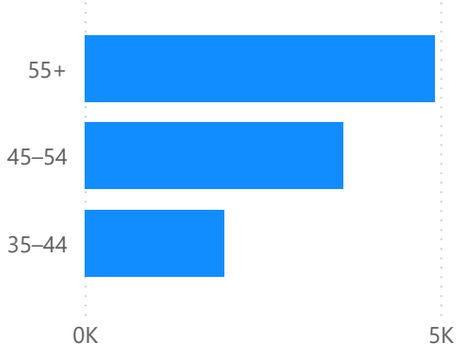

Buyers by gender | H1 2017

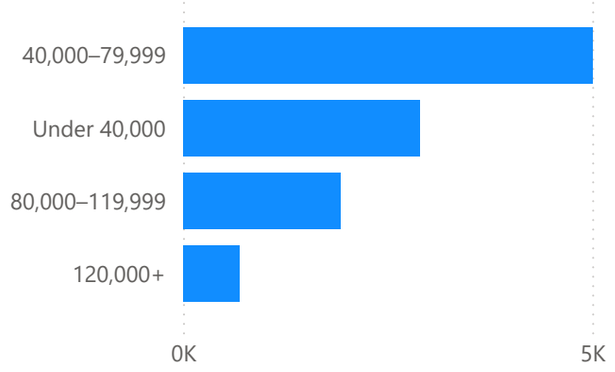

Buyers by home ownership | H1 2017

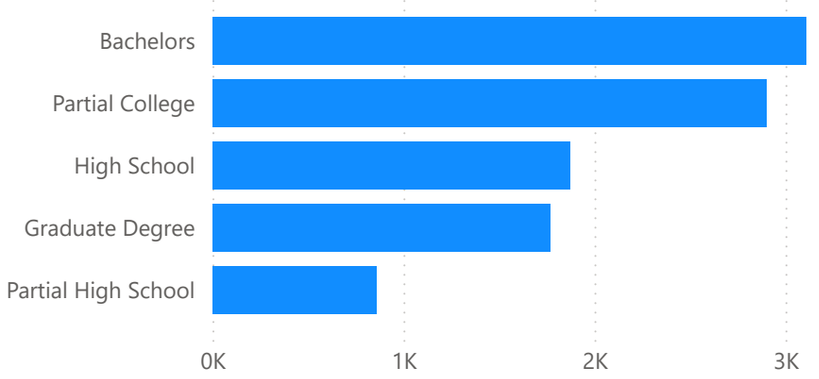

Buyers by age at 30 June 2017

Buyers by recorded annual income | H1 2017

Buyers by education level | H1 2017

Methodology: Buyers are counted once per model but may purchase several models; model counts are not additive. Profiles describe observed buyers. Customer attributes may not reflect circumstances at purchase.
